EXPERIENCE

NETAI
07/24 - NOW

DESIGN ENGINEER
At NetAi, lead for the complete redesign and development of the web application, I spearheaded the project from end to end, encompassing UI/UX design, architectural planning, and full development. I collaborated closely with team to ensure a scalable, user-centric, and high-performance solution, delivering a seamless and modernized user experience

SCULPTSOFT
12/20 - 07/24
REMOTE

UI DESIGNER + FRONTEND DEVELOPER
As a UI Designer and Frontend Developer at Sculptsoft I contributed to the successful delivery of multiple client projects across diverse industries. I specialized in creating intuitive and visually appealing user interfaces, ensuring seamless user experiences. Leveraging modern frontend technologies and frameworks. My role required close collaboration with cross-functional teams to translate client requirements into innovative, user-centric designs and robust interface

NETANALYTICS
04/21 - 06/24
FREELANCE

D3 FORCED LAYOUT + THREE JS DEVELOPER
I contributed in implementing data-driven visualizations using D3.js and ThreeJS with a focus on force layouts to represent network topology. I developed interactive and dynamic visualizations that provided insights into complex network structures, incorporating features like zooming, panning, and contextual tooltips. My work involved optimizing performance for large datasets and enhancing user interaction through intuitive controls

NETANALYTICS
10/20 - 11/20

UI DESIGNER + FRONTEND DEVELOPER
Worked as a React Developer responsible for making the user interface and perform API integration, collaborating with engineering and PM teams
